

HID Access Control Card readers

PCD-96HID

PCD-97HID

PCD-98HID

What is an HID card reader?

An HID card reader, or access card reader, is used in conjunction with HID cards.

The reader is generally placed near an access point and programmed to grant access when the HID card is placed near the reader.

Specifications

Product color	black	output protocol	WG26/34
Panel Material	Flame retardant PC	Card type	1326 PROXCARD II ID Card
Input voltage	DC12V	Operating temperature	-20°C-70°C
Sensing distance	3- 7cm	environment humidity	20%-90%
