

UHF-105 and UHF-115 is an outdoor IP66-rated long-range 920-925MHz proximity card reader designed specifically for S4A-access proximity cards and stickers.

With its 40 feet read-range, UHF-105 and UHF-115 provides users convenient RFID authentication for many applications including door access, vehicular gate access and any application in which the user no longer needs to have their RFID credential held in close range to the RFID reader.

UHF-105 and UHF-115 has a built-in Wiegand-Out port which can be connected to most any access control panel (including s4a-access ACB series control board as ACB-001, ACB-002, ACB-004).
